

MS-Series Industrial Grade for Professional Use

For 3/8" and 1/2" Hose I.D.

MS-Series are manual driven hose reels where long lengths of hose are required, as in Agriculture, Power Wash, Pest Control and Construction trades. Hose can be dispensed and retracted with greater ease and expedience than coiling by hand. The stainless steel construction should be utilized in harsh environments, such as chemical clean up or when an exceptionally clean area has to be maintained. All reels are shipped less hose unless requested on quote basis. Mounting holes 1/2" diameter.
